The latest news from Barrett Chute

Our big news is that Bell will be providing our Barrett Chute Waterfront community with Bell Fibre to the Home service. We are absolutely delighted with this news and the conduit for this service has already been installed along with the underground power.

Bell

Satellite TV, Fibe Internet and Home phone.

Percy Crosbie (Timber Ridge Contracting) who built our beautiful road has now completed the hydro pole installation and the wiring. We have yet to find something Percy cannot do...

We have also decided to move ahead with Phase 2. We have been encouraged by the response to the development and the interest in Phase 2. Phase 2 will offer 14 waterfront lots and 6 generously sized nature lots. There will also be another waterfront access point provided.

Construction of the Phase 2 road is underway and we hope to be in a position to sell lots by May 1, 2016. The lots themselves are not delineated yet by survey but their "rough" locations can be demonstrated. We are happy to tour by appointment only while construction is underway. By early spring we expect to have the lot boundaries in place with corner posts clearly marked.

As a result of our decision to move ahead with Phase 2 we will delay the hard surfacing of the built road until next summer to avoid damaging it with heavy equipment.

GENTLE WARNING

HUNTING SEASON BEGINS NOVEMBER 2, 2015

Hiking in the crown land area outside Barrett Chute owned lands is to be avoided during the annual deer hunting season.

There is some exciting Calabogie drinking and dining news as well. The Calabogie Brewing Great Company (www.calabogiebrewingco.ca) is now open at 12612 Lanark Rd. They brew locally inspired beers and have also opened up the Redneck Bistro right across the street to serve their beer and food. The Fiddler's Green Restaurant at Calabogie Highlands Golf Resort is under new management and The Valley Food & Drink Co. restaurant has opened up at Calabogie Lodge Resort (www.calabogielodge.com)

Please follow us on Facebook as we update it with our progress. We hope to see you up at the river soon!
